DETAILED ACTION

Response to Arguments

1. The Examiner has carefully considered Applicant's remarks dated 11/20/06 in response to Non-Final action dated 08/23/06. At this time in the prosecution the only pending claims are 1, 3, 4, 6, 7 and 11. Applicant's arguments are not found to be persuasive in terms of patentability for the reason set forth herein.

Applicant's traversal is that the final product of Applicant' and that of the cited art of Edlund/Edlund and Moll differs because their textile is woven on a Jacquard loom. Applicant does not claim this criticality, and thus Applicant's arguments are not commensurate in scope with that which is argued. Applicant's second traversal is that the Examiner has used hindsight when assigning the rejection. In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Applicant's last traversal is that the Examiner has not clearly set forth why a skilled artisan would have chosen the titer of either the warp or the weft to be 30-75 or 190 to 350 respectively. The Examiner's motivation was to for the reasons of strength, durability, flexibility and overall appearance of the textile as was set forth, in the middle of page 4, of the previous office action. Additionally, it should be noted that the cited are does teach Applicant's claimed range just in different direction, it is also the position of the Examiner

Art Unit: 1771

that once the final product was produced even one skilled in the art would not be able to tell which the warp was and which was the weft.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3, 4, 6, 7 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6291011 B1 issued to Edlund or USPN 6759116 B2 issued to Edlund in view of USPN 6267151 issued to Moll as set forth in the previous office action at paragraph 4 is maintained.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
